

**Table 4-6
Seneca Meadows, Inc.
Landfill Expansion DGEIS
Total Sound Levels for Noise Receptors**

Receptor Location¹	Total Sound Level (dBA)²	NYSDEC Part 360 Daytime Rural Community Sound Level Limits (dBA)³
NSL-5	53	57
NSL-6	55	57
NSL-7	54	57
NSL-8 Western Expansion	51	57
NSL-8 Eastern Expansion	52	57

Notes:

¹For receptor location NSL-8, noise impacts for both the western expansion and the eastern expansion were examined due to this receptor's central location between the two expansion areas.

²Total Sound Level for each receptor includes equipment noise and background noise. Attenuation for a screening berm with a minimum height of 15 feet is also included in the Total Sound Level.

³NYSDEC Part 360 Sound Level Limits: Rural 57 dBA; Suburban 62 dBA; and Urban 67 dBA.
